

BRIEF INFORMATION

HELLA VALUEFIT SMS2000 / Scene Light

- Slim and compact design that impresses the user
- Perfect design to be used for a variety of applications
- Homogenous light distribution all around the vehicle

PRODUCT FEATURES

The SMS2000 LED is a flat and compact LED worklight in an attractive yet understated design. The slim design for vertical wall mounting fits perfectly into small installation spaces and blends universally into the vehicle line.

Safety aspects were also taken into account in the construction. Thanks to the compact design without protruding components or sharp edges, there is no risk of injury to people. In addition, this means that the worklight is well protected from external influences even at high speeds.

The SMS2000 LED worklight is recommended wherever good and uniform ground illumination is to be achieved by a vertically mounted worklight. This feature is particularly appreciated by campers, truck and trailer users.

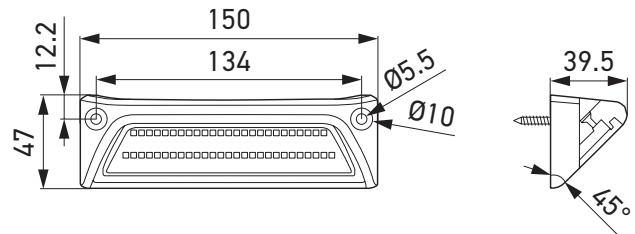

TECHNICAL DETAILS

Technical data

Rated voltage	Multi-voltage
Operating voltage	12 / 24 V
Current consumption	1.6 A (12 V) / 0.8 A (24 V)
Power consumption	max. 20 W
Light output	2,000 lm
Light function	Extra wide illumination
Light source	LED
Colour temperature	6,000 K
Material	Housing: aluminium die cast
Weight	Net weight 245 g
Temperature range	-40 °C to +60 °C
Protection class	IP 68, IP 6K9K
EMC protection	ECE-R10
Mounting	Flat surface mounting on the vehicle (including screws and rubber gaskets)
Connection	Cable length: 500 mm, cable ends open
